Most-potential Non-Conventional Energy Sources

4802. SHRI RAJNATH SINGH SURYA: Will the Minister of NON-CONVENTIONAL ENERGY SOURCES be pleased to state:

(a) what percentage of our total consumption of energy comes from the non-conventional energy sources;

(b) whether there was a decrease or increase during the last decade;

(c) the reasons for the increase / decrease; and

(d) which is the most-potential non-conventional sources in India?

THE MINISTER OF STATE OF THE MINISTRY OF NON-CONVENTIONAL ENERGY SOURCES (SHRI M. KANNAPPAN): (a) The total installed capacity of renewable energy is about 1700 MW till 31.3.2000, which is 1.75 per cent of the total installed capacity in the country.

(b) and (c) Power generation from renewables was on an increase during the last decade. This became possible mainly through the promotional policies of the Ministry including fiscal and financial incentives provided by the Ministry, institutional support and policies for attracting private investments for commercial projects. Besides, renewable energy technologies are eco-friendly and environmentally benign.

(d) Solar energy potential in the country is very high. Besides, small hydro power, biomass and wind energy are also having significant potential in the country.

Potential of Non-Conventional Energy Sources

4803. SHRI B.J'PANDA: Will the Minister of NON-CONVENTIONAL ENERGY SOURCES be pleased to state:

(a) whether Government have made any assessment on the potential of non-conventional sources of energy;

(b) if so, the details thereof alongwith the efforts made to tap the resources, State-wise;

(c) the targets set thereon for the Ninth Plan;

(d) the specific programme drawn up thereon for Orissa;

(e) the funds earmarked for generating power through non-conventional sources in Orissa and in other States; and

(f) the source-wise separate break-up thereof?

THE MINISTER OF STATE OF THE MINISTRY OF NON-CONVENTIONAL ENERGY SOURCES (SHRI M. KANNAPPAN): (a) and (b) On the basis of various studies sponsored / undertaken by the Government on a country-wide basis, the estimated broad potential of various Non-conventional Energy Sources in the country is given in Statement-I (See below). Details of State-wise achievements made under various Non-Conventional Energy programmes / schemes till 31st March, 2000 are given in Statement-II *{See* below)

(c) The physical targets fixed under various Non-Conventional Energy Programmes during the Ninth Five Year Plan period are given in Statement III. (See below)

(d) to (f) The Ministry does not allocate State-wise physical and financial targets for major Non-Conventional Energy programmes except biogas, improved chulha and solar photovoltaics for which targets are being finalised for the year 2000-2001. The State-wise central financial assistance provided under major Non-conventional Energy programmes during the Ninth Plan period including the State of Orissa is given in Statement IV.

STATEMENT-I

Details of estimated potential in the Renewable Energy Sector in the country

	Source / System.	Estimated Potential
1.	Biogas plants (No.)	120 lakh
2.	Improved Chulha (No.)	12 crores
3.	Biomass Power	17.000 MW
4.	Bagasse based Cogeneration	3500 MW
5.	Solar Photovoltaic	20MW/sq.km.
6.	Solar Thermal	35MW/sq.km.
	Solar Water Heating Systems	30 million square meter collector area
7.	Wind Power	45,000MW
8.	Small Hydro Power	10.000 MW
9.	Energy Recovery from wastes	1700 MW

MW = Mega-watt Sq. Km. = Square Kilometer

STATEMENT-II

State-wise Cumulative Physical Achievements made under major non-conventional energy programmes as on 31-3-2000.
